

TriContainer Waste Disposal Information, RFQ# 01-9028

Waste Stream: Tank Liquid, TC-008  
Volume: 18,000 gallons  
Matrix: oil/water/sludge

General Characteristics

% water 30  
% ash 1  
Spec.Grav. 0.99  
Rx. none  
pH 8.7  
Ignitibility > 212  
BTU/Lb 2,220  
Halogens 0.14 %

Chemical Composition (%)

water 20-40  
waste oils 40-60  
oily sludges 15-30  
inert solids 1-10

Some of the detection limits are greater than the regulatory limits. These codes will be assigned but for now they are shown as less than whatever the detection limit reported by the laboratory. The characteristic waste codes actually detected are in bold.

D001	D012 <0.24	D022	D032 <4
D002	D013	D023	D033 <4

D007 54.1	D018 <0.63	D028 <0.63	D038
D008 95.2	D019 <0.63	D029	D039 <0.63
D009	D020 <0.12	D030 <4	D040 <0.63
D010	D021	D031 <0.12	D041
D011			D042 <4
			D043 <0.63

All values reported are total concentrations, not TCLP values. This waste is currently stored in an above ground storage tank; we would like to pump and ship the liquids off in bulk and then either drum up the sludge or solidify it for bulk transport depending upon the pricing. Please address this in your bid.
